

Tolson Worried by Axing of the Rosyth Ferry

Jim Tolson MSP for Dunfermline West, submitted questions to the Scottish Government following the axing of the Rosyth Zeebrugge ferry service.

Jim said “I’m very worried by the whole situation. We need this service. It is the only ferry link from Scotland to the Continent. Once the service finishes in September, freight and car drivers will now have to make the long journey down to ports in England before starting on the Continental leg of their journey. This will increase journey times and increase the fuel costs.

I want to know just how much public sector investment was made to establish the service in the first place and how much effort has been made to retain the existing service or find a replacement service.”
